1. The amendment filed Feb. 2, 2004 has been entered.
2. Claims 17 and 23-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over DeOca et al US 4,785,676.

DeOca et al shows the basic retrofitted elbow pipe with a sampling septum claimed. It would appear to inherently be configured to create a non-laminar flow due to the bend in the pipe. Use of a container of generic utility and penetrating body therewith would have been an obvious expedient to facilitate sample collection given its disclosed use and septum structure. Including all the components together as a kit would clearly further aid in use. Use of kits to facilitate associate plural elements known to be useful in combination is considered an obvious assembly and use convenience to one of ordinary skill.

3. Claims 1-16 have been allowed.
4. Applicant's arguments filed Feb. 2, 2004 have been fully considered but they are not persuasive. Applicant's arguments were persuasive with regard to claims 1-16. Applicant's hindsight argument re claims 17 and 23-25 was not persuasive given the intended use in DeOca et al.
5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
